## Revere's Energy Surcharge

Energy Surcharge based on Electricity and Natural Gas Pricing

### Energy Surcharge - Effective with Shipments 8/1/2024 \$0.0100/lb

The energy surcharge is tied to the cost of both natural gas and electricity. These costs are tracked by the U.S. Energy Information Administration.

The two indexes used will be:

[Henry Hub Natural Gas Spot Price \(Dollars per Million Btu\) \(eia.gov\)](#)

[Electricity data browser - Average retail price of electricity \(eia.gov\)](#)\* *Note there is a 2-month lag in reporting*

The monthly settlement price effective for each month and the range listed below will be used to determine the energy surcharge effective for orders shipped during the month. Monthly settlement prices are published at the beginning of each month.

<b>August Effective Energy Surcharge</b>			<b>\$ 0.0100</b>			
July Natural Gas @ \$2.082			\$ -	May Electricity @ 7.95 Cents		\$ 0.0100
<b>Natural Gas</b>			<b>Electric</b>			
Range \$/million BTU		Surcharge (\$/lb)	Range Cents/Kwh		Surcharge (\$/lb)
